Preliminary Steps to Get Together a Fine Exhibit - Official Returns From the Late Election Nearly All In-Miscellaneous Matters in Nebraska.

LINCOLN, Neb., Nov. 20 .- Even If the agricultural resources and business interests of the state are not represented there will be on exhibtion at the Paris exposition in 1900 examples of the work done by the public school children of Nebraska. There is a great deal of sameness in all public school exhibits and in view of this fact an attempt will be made to emphasize the remarkable growth of the Nebraska schools and to give an accurate idea of the high standard of education in the west. Superintendent Jackson has been considering plans for an exhibit for some time and the preliminary steps have already been taken. Copies of the Nebraska school laws and other statistics concerning the schools of the state have been bound expressly for the exhibit.

There will also be comparative statements showing the condition of the schools at different periods and from one of these the following figures are

THAT INSURANCE CONTROVERSY

The Test Case Before the Supreme Court Likely to Be Hotly Contested.

LINCOLN, Neb., Nov. 17 .- The 1egal controversy as to the liability to the state of the insurance companies that paid fees to Eugene Moore as auditor is becoming more complicated and the test case now pending before the supreme court promises to be hotly contested on both sides before a decision is allowed to stand. In the brief and argument of the defendant in the case of the State of Nebraska against the Home Insurance company, filed in the supreme court, three points are raised by which it is hoped to relieve the insurance companies of all further liability.

The argument opens with the assertion that the brief of the state contained no positive argument in support of its claim and that the attorney general proceded upon the assumption that because Moore was not convicted under section 124 of the criminal code, as auditor of public accounts, of embezzlement of the insurance fees in question, and because the sureties upon his official bond are not liable to the state for his defalcation with regard to money which he, as auditor, had no right to receive.

The first of the three points raised by the Home Insurance company is that under the constitution of Nebraska the auditor had no right to perform services for the defendant and oher insurance companies unless the fees therefor were paid in advance into the state treasury. The second point is that the state is estopped to claim from the defendant insurance company compensation for services of the auditor which he could not legally perform unless the fees therefore were paid in advance into the state treasury.

Used His Brains.

Sometime ago a brakeman on the Baltimore & Ohio Railroad used his brains and saved a passenger train from running into two derailed cars. The Company sent him a check for \$50 and posted a bulletin complimenting him for his quickness of thought. A few days later, Engineer John Hag-erty was oiling his engine at Connellsville, while waiting for the passengers to alight. He heard another train coming and believed that it was not under proper control. He sprang into his cab, opened the throttle and started his train. The other engine struck the rear car but it was not a hard blow and Hagerty's promptness saved ten or a dozen lives. The Company has ordered a handsome gold watch, suitably inscribed, and a gold chain for Engineer Hagerty, as a reward for his devotion to duty and "using his brains" in time of emergency.
